

## ASN International School

Dear Parent

Date : 01.11.2018

With the growing air pollution level in the city and NCR, to ensure that our students don't face health hazards due to air pollution especially which arises early morning. The school has adjusted the morning outdoor activities accordingly for the students.

The management and staff are doing their best in keeping your ward in a clean environment. Let's get together hand in hand and re enforce this pursuit to be safe and breathe clean air.

We would be highly grateful if you could donate willingly any one air purifier plant that will be kept in their respective classes (eg. Areca Palm, Lady Palm, Bamboo Palm, snake plant, Aloe vera plant etc. )

Your cooperation & encouragement with the school to create an awareness among children about the adverse impact of indiscriminate burning of firecrackers on public health will be a good source of support to us as well.

Looking forward for your cooperation as you always do.

Warm Regards  
Shivani Khanna  
Headmistress
