Message from the Incharge

Dear Parents

Greetings!!

On behalf of the entire School ASN family, I wish you a very Happy New Year!

With the advent of another New Year, let's step into its threshold with abundance of optimisms, aspirations, and dreams by bidding adieu to the bygone year. Well, it's an ideal time to introspect ourselves and move ahead gallantly to face the challenges with invincible spirit and tenacity.

For us, the year bygone was the year of path-breaking developments in areas of school set up, improvement and education technology. The decade nearing its end, we experienced several developments and shifts in the arena of school education.

As we gradually emerge from these testing times, we are reminded of the mythical bird, the Phoenix that rises from the ashes, resilient and stronger than before! The pandemic has taught us great lessons and our students and teachers alike have found opportunities in adversity to overcome obstacles. We have passed the test with flying colours! Your cooperation has been a great scaffolding for the process.

These past pandemic months have not deterred or dampened the spirits of our children. They have enjoyed and engaged joyously in the digital mode of learning, participating whole- heartedly in events and competitions, simultaneously. The journey has indeed been very joyful for the teachers too, albeit, initially challenging. I am glad the learning never stopped. Dear Parents, do encourage your children to be a part of the myriad opportunities the school offers. Our encouragement and support will help them discover their abilities and develop these to the best extent.

Last but not the least, let's continue to support each other as a family so that our children grow up as secure and strong young adults. Let's always remember to be role models for them in our values, beliefs and the way we conduct ourselves. Never forget that children are like sponges that soak up all that they are exposed to. So, let's consciously make a special effort to secure our children as happy and well-mannered human beings especially in a rapidly changing world filled with several uncertainties. We owe it to them to set the best example.

Warm Regards

Sarika Srivastava

Global Curriculum: Patriotism

Lohri Celebration

The pre-primary wing celebrated the harvest festival with full gaiety and enthusiasm. They did an art activity in which they created a bonfire and learnt the significance of lighting a bon fire on Lohri. The aim of celebrating this festival is to teach and apprise them of the rich culture and traditions of their country. Students were dressed up in vibrant costumes. Dhol beats and Punjabi folk music added to their excitement. They also relished the special savouries of Baisakhi.

Republic day Celebration

26TH JANUARY

Republic Day celebrations were held on the virtual platform with patriotic fervour and zest as the children learnt about the freedom struggle and how the great sons of the motherland have fought to free their country from the clutches of foreign rule. They also learnt through PPT that it is one of our National festivals, why and how it is celebrated. India is a land of diversity but also an embodiment of unity. To acquaint the students about our diverse culture students dressed up in costumes of different states and spoke about their food, handicrafts, dance forms etc.

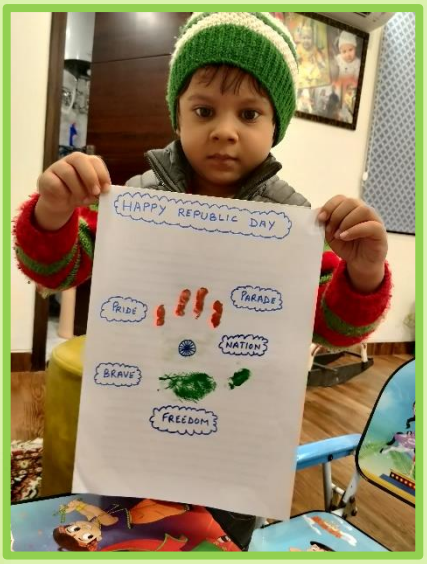

SCRAPBOOK ACTIVITY

NATIONAL FLAG

Students created a flag using their handprints and learnt what the colours in their flag signify.

Little ARCHITECT COMPETITION

Students created beautiful structures with blocks. Through this activity students were able to explore and express themselves as they embarked on a voyage of discovery. It also promoted the development of spatial awareness and developed hand-eye co-ordination apart from developing creativity, language, mathematics and problem-solving skills.

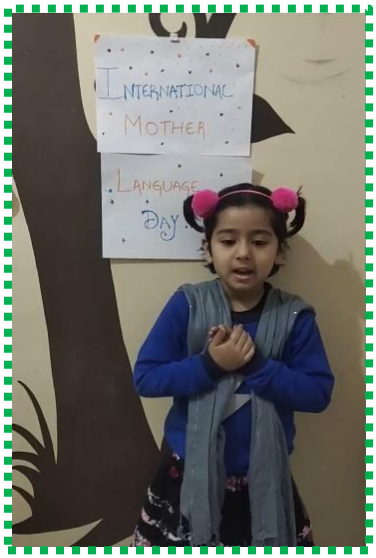

INTERNATIONAL MOTHER LANGUAGE DAY

International Mother Language Day is a worldwide annual observance held on 21st February to promote awareness of linguistic and cultural diversity and to promote multilingualism. Mother Tongue is a language which a child gets to hear from birth and it enables them to express their thoughts and feelings. It is not only one's own language but it is also a person's identification. To celebrate this occasion students presented songs and stories in their mother language. Students also learnt about the different languages spoken in their country.

JUNK TO JOY

By putting their innovation and creativity students created few things using waste materials. Through this activity students learnt to minimize waste and the importance to recycle. They also learnt possible ways to protect nature and keep it clean apart from preserving our natural resources by using it judiciously and how products made using recycling materials are cheaper compared to others.

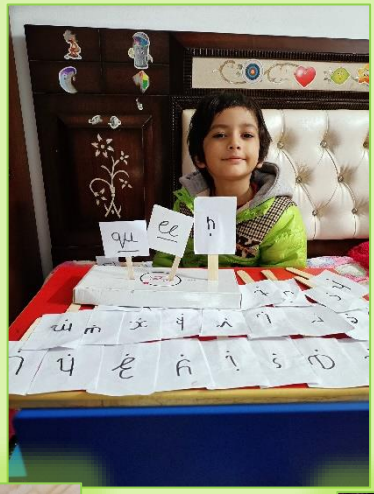

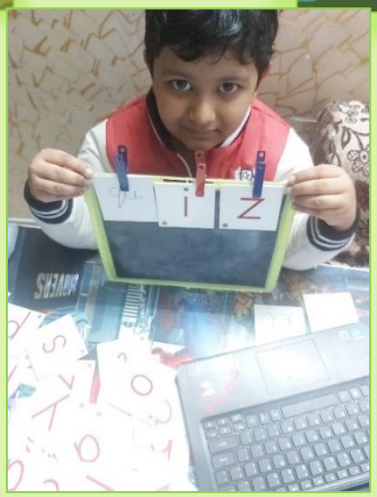

Experiential Learning

Building vocabulary of ''qu'' and ''ue'' digraph:

Students created words of qu and ue digraphs by using letter cards, disposable spoons, etc. These activities give the young learners an opportunity to use a kinaesthetic approach to learning by handling the letters and physically placing them in order to make words. They also understand the relationship between written letters and spoken words.

The students were taught the concept of tens and ones with the help of straws, ganit mala, and saga board. It helps the students to focus on the pattern of counting with thorough knowledge of the concepts instead of memorization as well as to understand that two digits of a two digit number represents amounts of tens and ones.

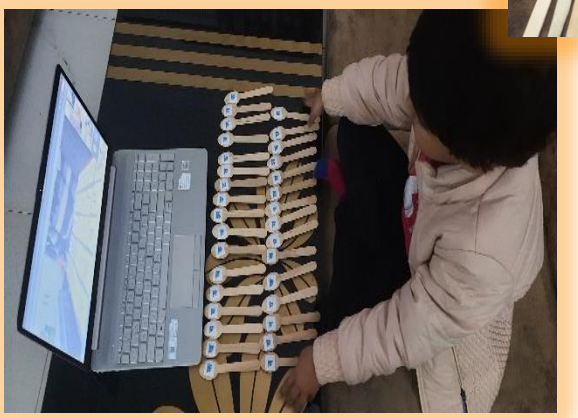

हिंदी

Sequencing the vyanjans –

As the students have completed learning all the vyanjans, they were taught to sequence them in order using letter cards. Sequencing give kids a practical skill that applies in many areas of life and the more they are familiar with the letters the faster they learn to write and frame words and sentences and it is much easier for them compared to English because Hindi is a phonetic language because the words are spelt in the same way as they sound.

5 THINGS PARENTS CAN DO TO RAISE

confident kids

1. Ensure your child knows they have your unconditional love.
2. Ask your kids for their opinion on decisions.
3. Stop comparing your kids to other kids.
4. Give tons of hugs
5. Praise the effort not the outcome
