

Message from the Incharge

Dear Parents,

Greetings!

I wish the entire ASN community a very warm welcome to the new academic year 2021-22 at ASN School. As we step into this new school year, I am very optimistic that this will be a time of new and novel learning - a season of new beginnings and a time of hope amidst a sea of change!

The ability to adapt to change and uncertainty, to adjust to a fast paced, globalised world, cultural guidance, sensitivity and mentoring, whilst building competent skill sets in our students to stay ahead of the curve are essential learnings in education today. In addition to knowledge acquisition and performance, character building, leadership and life skills are imperative. Holistic education enables a child to develop and grow beyond classroom learning. As partners in the learning community we all have our roles to play- of being the best role models for our children to emulate, is our great responsibility and duty. An unconventional start to this academic year with online learning, I continue to emphasize on discipline, punctuality, attendance, commitment, mutual respect and a spirit of gratitude.

"What we learn with pleasure we never forget". Alfred Mercier

Teachers and educators are in a perfect position to make learning environments and experiences enjoyable and memorable. Students must be engaged and invested to make the most of the learning opportunities available, hence I say it is important to be committed to learning. Emotional, social and mental health and well-being are significant concerns during this time of greater dependence on technology and remote learning. With limited physical interaction, and opportunities for socialisation, we need to be vigilant and sensitive to any altered behaviour and attitude in our children.

My vision for the ASN student fraternity continues is to be expansive. To possess qualities of international and open mindedness, with an unquenchable thirst to learn and expand one's horizons, to appreciate and respect different perspectives, to value the uniqueness in each other's differences, to develop a greater inter cultural sensitivity and understanding and to cultivate a spirit of gratitude, positivity and hope. At ASN our endeavours continue to provide our students unparalleled learning and excellence. I believe this new school year will teach us all to step out of our comfort zones, to view life with renewed strength and boldness, to usher in a season of new learning, achievements and success .We all look forward to working closely with you in maintaining the continuity of the best learning and teaching environment for our children.

Please do take care and stay safe.
Regards

Ms Sarika Srivastava
Incharge - Pre-Primary Years

SNAPSHOT of the month

Welcome card activity

On the first day, children did welcome card activity in which they created flowers using the cut out of their hand prints. These activities helped the students in the development of their fine motor skills, eye hand co-ordination, identification of colours and experiment in a fun and relaxed environment. As the children embark on their next journey this activity prepares children for a positive start to a new session.

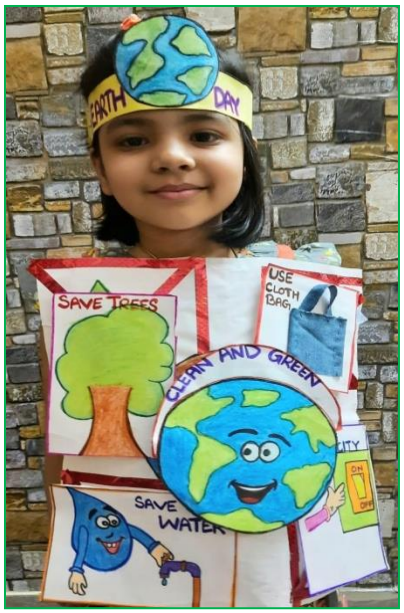

EARTH DAY CELEBRATIONS

Various activities were conducted through which students were able to understand the importance of protecting their planet by following sustainable actions in their daily lives.

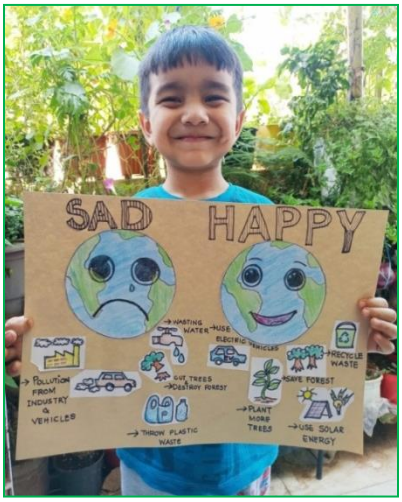

ROLE PLAY

Through these enactments children realized that they too can make a significant contribution in saving the environment. Starting early can truly make a difference and inculcate habits they will carry on as they grow.

GERMINATION: The students explored the fact that seeds germinate and grow into plants; they learnt about the different parts of a plant and the essentials they require to grow. This visual helped the kids create better connections with the environment.

GIVING TREE ACTIVITY

Through these hands on activity, children learnt about all the wonderful things they get from plants and understood the interdependence of all living species.

CLAY MOULDING:

Through these fun activity children felt connected to the environment. They created beautiful clay pieces and shared their thoughts on protecting the planet.

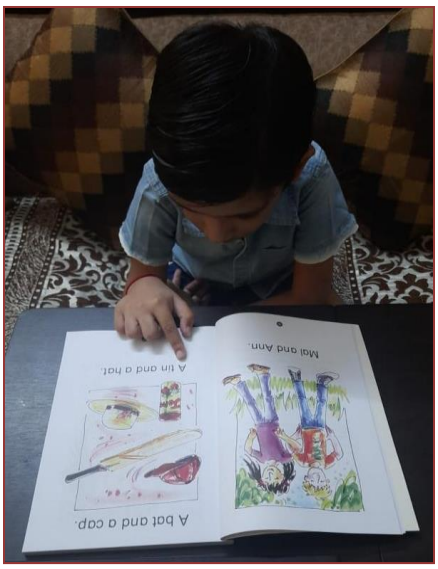

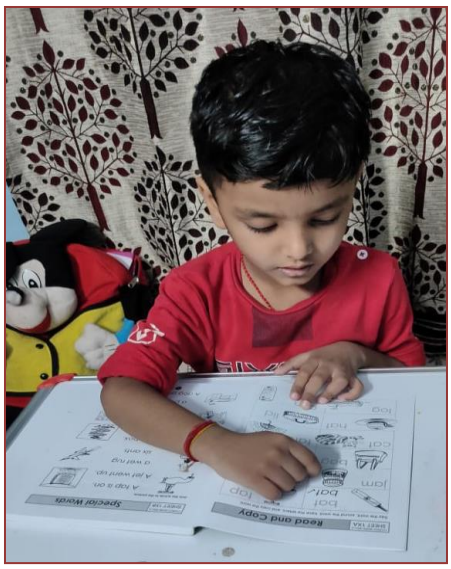

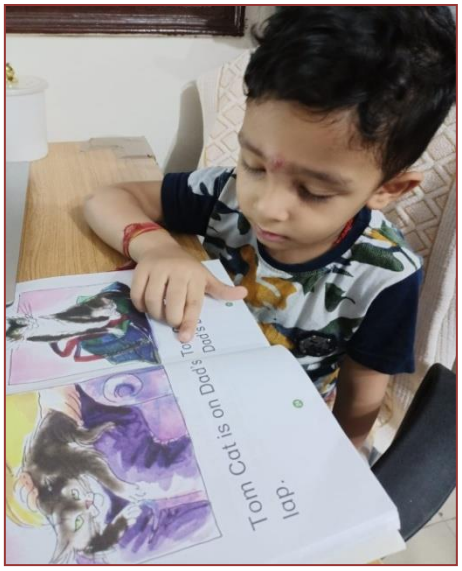

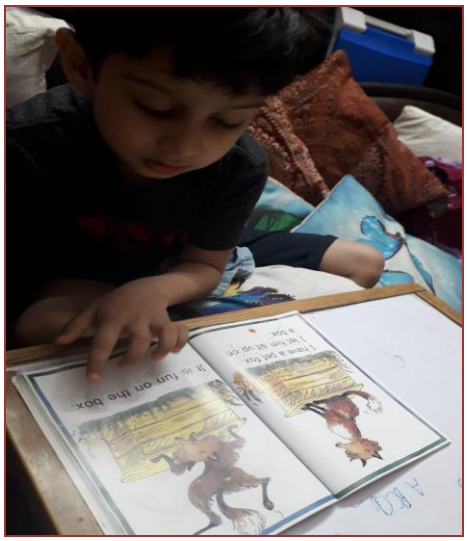

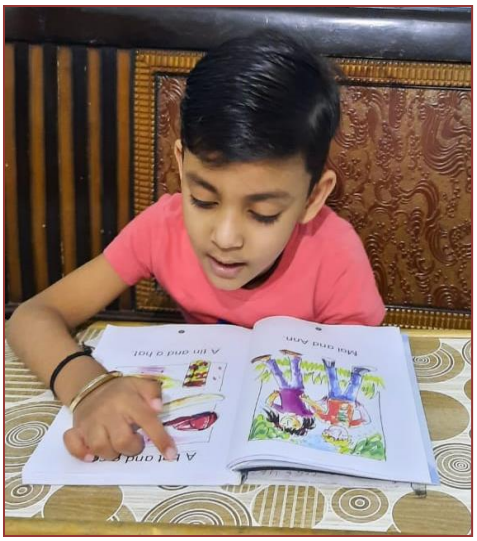

DROP EVERYTHING AND READ

This activity was conducted to instill a reading habit in students and dedicate sometime for reading everyday for the development of the language skills.

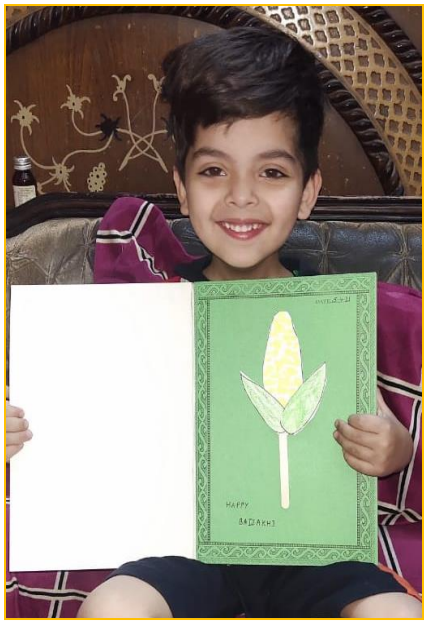

BAISAKHI CELEBRATION

The students could understand the significance of the festival and how it is celebrated in different parts of the country. They also realized that the farmer works day in and out in their fields to grow the crops.

ACADEMICS

English:

Vowel sorting activity

Once the students were comfortable in identifying the beginning and ending sound the focus shifted to identifying the vowel sound in a word. This activity allowed students to focus solely on identifying the vowel in the word. Picture cards prompted the children to say the word aloud and listen to the middle sound.

Maths:

Number quantification:

Activity: Bindi Pasting on popsicle sticks as per the number:

Quantification is the ability to identify sets of objects. Children quantify using one to one correspondence skills. Through this activity child were able to count and quantify bindis as per the given number.

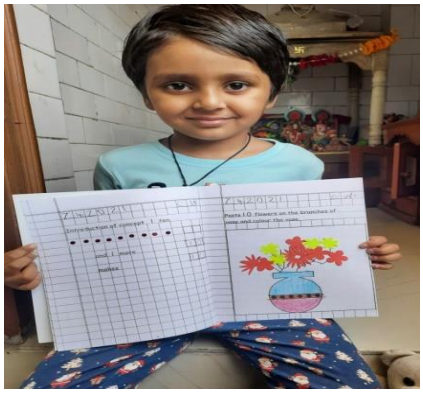

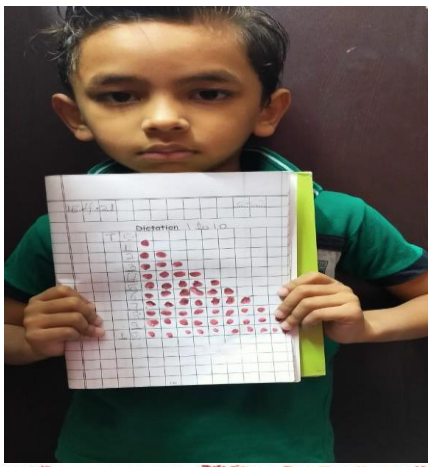

Shapes:

Activity: Fun with shapes

Learning shapes helps children to identify and organize visual information. Through this activity students were able to identify the basic shapes in the environment and classify them under different categories. This activity helped the children to create various objects with shapes in a fun way.

Concept of 1 ten:

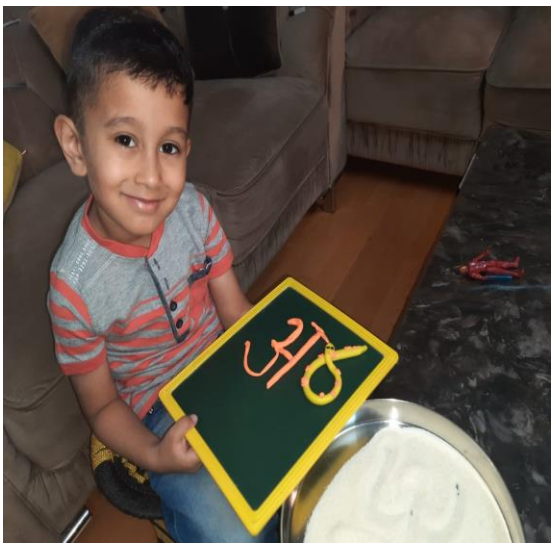

Activity: Flower pasting & Ear bud printing

Children learnt to identify the tens and one's place in a number and they also learnt to count out a group of objects and place them in a group of 10.

Hindi:

It is a new language introduced to the children in class KG. So, after the introduction of each letter through a video and a PPT the writing of the letter was introduced through air writing or semolina tracing. This activity created a big cognitive impression and helped cement the letter in the child's memory and also gave the children in depth practice of writing.

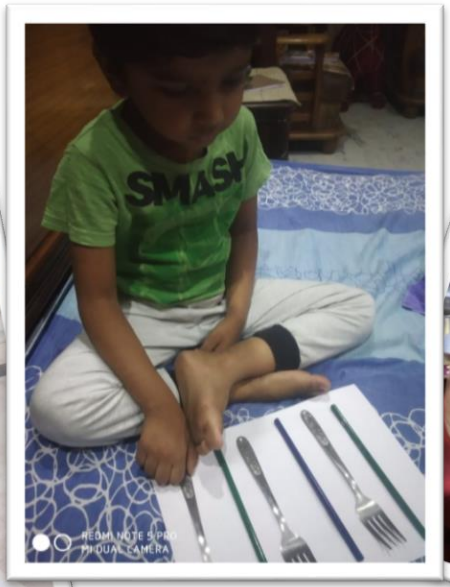

Our school incorporated an array of enrichment activities taken up by teachers, who showed remarkable resilience in the face of this global, public health emergency. Empowering our students and the community is the focus for us right now. Throughout, our intention was to ensure that effective teaching and learning, developed through years of research into what works in the classroom, could be translated to the online medium. So, as the mixed economy emerges – of some learning at home and some learning at school – the school wants to support you in that too. The creative program lessons deepened and strengthened relationships with students, established a more direct relationship with parents as the learning locus of control has shifted much on them too, while reinforcing concepts in a fun and thrilling way. Whatever the times we will aspire to give the young people in our care the very best education they deserve.
